Model 81X

ANSI Metering Class 0.3 B1.8

The Model 81X is an auxiliary transformer for use in the secondary of main current transformers to change the ratio for metering applications.

Since the Model 81X is used in the secondary of another current transformer it has no voltage rating. It is given a 2500 Volt 60 Hz high potential test. It is designed to be used on circuits not to exceed 600 Volts to ground or between windings.
