## Model 5500 Manually Controlled Switch Box

---

### DESCRIPTION

The Model 5500 is a manually-operated switch box. This unit will permit the connection of up to three Magtrol Hysteresis Dynamometers to a single controller and/or readout.

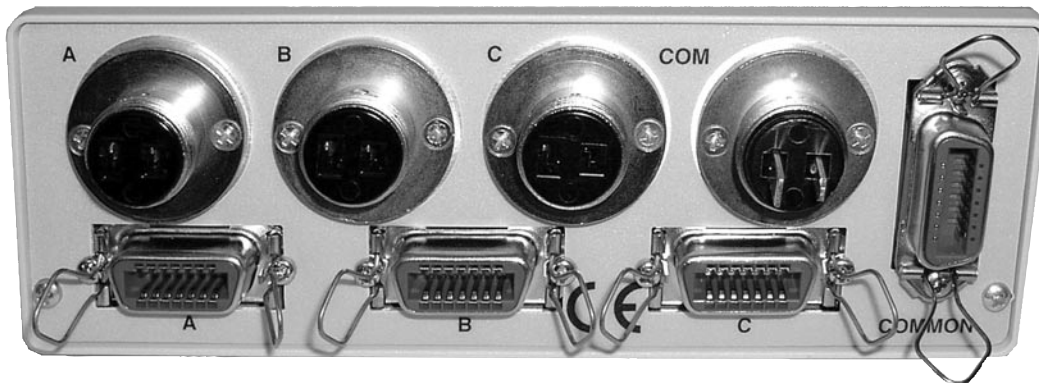

Use of the switch box facilitates quick and easy interfacing of multiple dynamometers without the necessity of disconnecting and reconnecting the brake and control cables.

The Model 5500 is supplied with one additional set of interconnecting cables (one 2-pin brake cable and one 14-pin accessory cable).
