

The Future of Test Chamber Refrigeration Technology - Today

LEEF Technology provides unmatched performance in your testing requirements. LEEF's high efficiency innovative technology offers significant benefits and reduces carbon footprint at the same time.

Environmental test chambers are often used for more than 15 years. Weiss Technik provides you the technology of the future - making your test chambers and lab future-proof!

Let Weiss Technik help improve your testing and your environmental stewardship.

Leading Energy Efficiency Footprint

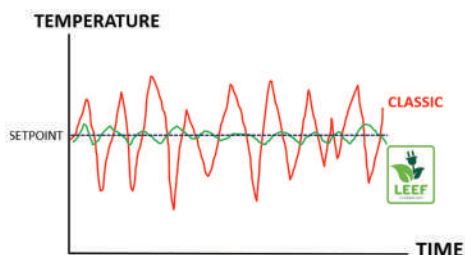

Customer Benefits

- **Reliability** of test results: Up to 70% improved accuracy of temperature and humidity settings
- **Productivity**: Reduce test time thanks to up to 60% faster temperature pull down rates
- **Cost Savings**: Up to 40% energy savings
- **Sustainability**: LEEF actively supports policies to reduce the Carbon Footprint
- **LOW GWP (Global Warming Potential)** - R-449A Refrigerant

See our LEEF Technology and LOW GWP/R-449A White Papers and LEEF Video at www.weiss-na.com

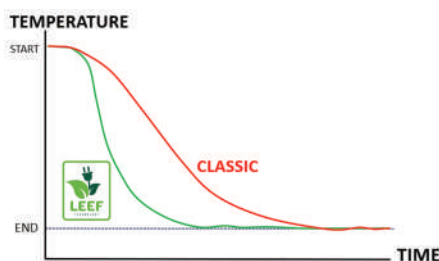

Control Accuracy

(Up to 70% More Accurate)

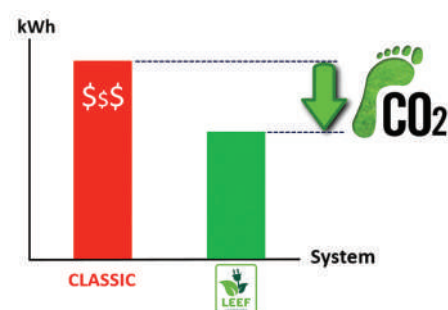

Ramp Rate

(Up to 60% Faster)

Cost of Operation

(Up to 40% Lower Energy Consumption)

Available on These Product Lines:

Stand the test of time.
